Letter of Promulgation

The University of Texas at Austin is committed to protecting the welfare of its community members as well as its intellectual property and facilities. For this reason, the Assistant Vice President for Campus Safety has developed the Emergency Operations Plan. With this plan, the university strives to minimize the impact of emergencies and maximize the effectiveness of the campus community’s response to and recovery from their inevitable occurrence.

We can best prepare to meet the enormous challenges emergencies present by working together. Thus, The University of Texas at Austin expects individual departments to develop their own detailed plans to effectively organize, coordinate, and direct available resources toward emergency response and recovery. As such, the Emergency Operations Plan includes a chain of command that establishes the authority and responsibilities of campus officials and staff members. The plan also requires departments to designate emergency coordinators who will have the authority to make modifications in emergency procedures and commit resources to emergency management as necessary.

The Emergency Operations Plan is designed to help university employees respond appropriately when emergency conditions exist. Although these situations are unpredictable, this plan allows for an immediate response by university employees, thereby minimizing danger to our campus.

Every member of The University of Texas at Austin community should understand his or her role in emergency situations. Please review this manual so you can support your colleagues and protect our students, faculty, staff, and visitors should an emergency arise.

Thank you,

Dr. Jay Hartzell
President
The University of Texas at Austin

1. Purpose, Scope, Situation, and Assumptions

1.1. Plan Overview

The University of Texas at Austin (“University”) Emergency Operations Plan is a framework for a coordinated response to emergencies and disasters (collectively referred to as emergencies throughout this document). This plan provides an incident management structure for all emergency operations, but does not include, nor is a substitute for, specific procedures for safety or hazardous material response.

The incident management structure set forth in this plan is flexible and may expand or contract as the situation warrants. This plan is based on a worse-case scenario and provides for the critical functions and roles of the University during an emergency response. However, its general procedures for the management of information, activities, and operations can be applied during any type of emergency.

The Emergency Operations Plan is an “all-hazards” document and contains concepts, policies, and procedures that apply regardless of the nature or origin of an emergency. This plan, therefore, does not address all unique conditions that may result from a particular hazard or event.

The Emergency Operations Plan is part of a suite of plans that the Office of Emergency Management maintains. The complete suite of plans addresses all aspects of the emergency management program, while the Emergency Operations Plan focuses on response. Additionally, there are plans that cover the other phases of emergency management. Below are the 3 main plans that take effect after an incident occurs. In addition, all buildings on campus have a Building Emergency Plan (BEP) which address specific procedures for occupants during an emergency.
This plan is based on the National Incident Management System and the Incident Command System, a management structure adopted throughout the U.S. and international communities. It also stems from the State of Texas’ Emergency Planning Guidance and the National Response Framework. Accordingly, this plan’s approach to emergency management is rooted in a four-phase structure where the phases of mitigation, preparedness, response, and recovery each contain a critical University procedure for emergencies.

This is the overall plan for the University, but may not address specific needs for all departments. Departments, colleges, and schools shall develop any additional emergency procedures as required that are consistent with this plan.

1.2. Purpose
This plan fulfills the Texas State Education Code Section 51.217 requirement that an institution of higher education adopt and implement a multi-hazard emergency operations plan that addresses mitigation, preparedness, response, and recovery. Additionally, this plan fulfills The University of Texas Systems Policy UTS172 requirement that each institution incorporates the National Incident Management System and the Incident Command System.

This plan provides guidelines and a framework for emergency organization, communications and information management, decision-making, response operations, and recovery operations. The following statutes, regulations, and standards were used to provide guidance and authority to develop this plan.

1.3. Authorities
• Federal
  o Robert T. Stafford Disaster Relief & Emergency Assistance Act, (as amended),42 USC § 5121
  o Homeland Security Presidential Directive, HSPD-5, Management of Domestic Incidents
  o National Incident Management System
  o National Response Framework
• State of Texas
  o Government Code, Chapter 418 (Emergency Management)
  o Government Code, Chapter 421 (Homeland Security)
  o Government Code, Chapter 433 (State of Emergency)
  o Government Code, Chapter 791 (Inter-local Cooperation Contracts)
  o Health & Safety Code, Chapter 778 (Emergency Management Assistance Compact)
  o Executive Order of the Government Relating to Emergency Management
  o Executive Order of the Government Relating to the National Incident Management System
  o Administrative Code, Title 37, Part 1, Chapter 7 (Division of Emergency Management)
  o The Texas Homeland Security Strategic Plan, 2015-2020
  o Texas State Education Code Section 51.217
• Local
  o UTS172 Emergency Management
1.4. Plan Scope

The measures in this plan will be enacted in response to any circumstance occurring at the University that requires greater than day-to-day resources to protect safety, health, property, the environment, and/or critical operations, including:

- **Events**: Planned occurrences that require resources greater than customary day-to-day staffing to ensure the safety and wellbeing of event participants, and the coordination of these resources to ensure a safe and successful outcome. Examples include commencement, guest lectures requiring special security, and large gatherings such as football games. Unlike incidents, events can be rescheduled or cancelled.\(^1\)

- **Incidents**: An occurrence or event—natural, technological, or human-caused—that requires a response to protect life, property, or the environment (e.g., major disasters, emergencies, terrorist attacks, terrorist threats, civil unrest, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, tsunamis, war-related disasters, public health and medical emergencies, other occurrences requiring an emergency response).

Generally, there are two categories of incidents:

- **Emergencies**: Any incident, whether natural or human-caused, that requires responsive action to protect life or property; and

- **Disasters**: An occurrence of a natural catastrophe, technological accident, or human-caused incident that has resulted in severe property damage, deaths, and/or multiple injuries.

This plan applies to the University campuses as noted in Section 1.5, below. Should an event or incident impact, or be expected to impact, the University’s campuses or community, the University will implement the measures in this plan. The University is not responsible for managing emergencies that occur at other University of Texas System universities, but may assist in responses or provide resources through existing mutual aid agreements.

1.5. The University

The University of Texas at Austin is the flagship school of the University of Texas System located in Austin, Texas. Founded in 1883, the University has over 51,000 undergraduate and graduate students, roughly 10% of whom are from outside of Texas or the United States.\(^2\) The University also employs more than 20,000 faculty and staff members. Research is another core function of the University; faculty received nearly $796 million for sponsored projects for the 2019-20 academic year.\(^3\)

The University includes the following campuses (* denotes within The University of Texas Police Department jurisdiction*):

- Main Campus; Austin, Texas*
- J.J. Pickle Research Center; Austin, Texas*
- Lady Bird Johnson Wildflower Center
- McDonald Observatory; West Texas
- Marine Science Institute; Port Aransas, Texas
- Winedale Historical Center; Round Top, Texas

---

\(^1\) Definition from Tufts University Emergency Operations Plan, Version 2.4.1.

\(^2\) The University of Texas at Austin, Facts and Figures, updated September 2020. International students or students who come from other states may require additional support during emergencies. For example, they may not be able to return home during a prolonged closure, as opposed to local students.

\(^3\) The University of Texas at Austin, Facts and Figures, updated September 2020.

\(^4\) The University of Texas at Austin Police Department, Authority and Jurisdiction.
As noted above, The University of Texas Police Department responds to emergencies occurring on most campuses located in Austin, Texas. Other campuses rely on local city or county police departments for initial responses. Local city or county emergency medical services and fire departments respond to all campuses.

1.5.1. Special Populations

Some members of the University community may have access or other special needs that must be addressed in emergency planning and response:

- **Students in University Housing**
  Although most students commute to and from campus, 8,845 students live in 14 on-campus residence halls and one off-campus residence hall. The University also operates three apartment complexes located off-campus made up of 715 units. Many of these students rely on University dining halls for meals. The continued need to provide housing and meals to a large number of campus community should be considered during an emergency.

- **Community Members with Access and Functional Needs**
  Some members of the campus community have access and functional needs, including disabilities or limited English proficiency. Response activities may need to be modified in order to assist members of the campus community with these needs.

- **Children in University Facilities**
  The University operates The University of Texas Charter School System (UTCSS), a diverse school district that consists of 24 campuses covering Austin, Houston, Fort Worth, and the San Antonio area. The UTCSS has developed their own Emergency Operations Plan that is a supplement to the UT EOP and meets all state and local standards for public and charter school emergency plans. The University also operates four childcare centers on campus and near campus, in addition to various camps and other youth programs throughout the year. Special accommodations may need to be made for the children in university facilities during an emergency, particularly in relation to family reunification. One of the supplemental plans to this document addresses youth reunification in the event of an emergency.

---

5 As of Fall 2021, per University Housing and Dining staff.
1.6. Threat and Hazard Identification and Risk Assessment (THIRA)

The University faces risks from many threats and hazards, planning separately for all of them would require an enormous amount of time and resources. Rather than plan for every possible threat and hazard, the University embraces capabilities-based planning based on national emergency management frameworks. Capabilities-based planning builds and sustains core capabilities that can help prevent, protect against, mitigate, respond to, and recover from multiple threats and hazards. Capabilities-based planning is the foundation of the National Preparedness System, a system the University uses as a basis for its Emergency Management Program\(^6\).

The first step of the Threat and Hazard Identification and Risk Assessment (THIRA) is for the Office of Emergency Management to identify a preliminary list of 27 threats and hazards that could affect The University. The Office of Emergency Management used the Campus Safety and Security Committee to provide stakeholder engagement of many departments across campus to complete a THIRA survey and reduce the threats and hazards to the top nine (9) most likely natural, human-caused, and technological possibilities.

The next step involves a safety and security subject matter expert group review of these 9 threats and hazards to select the 6 threats and hazards that would most challenge The University’s 32 core capabilities\(^7\). The table below identifies the 6 top threats and hazards for the university during this review cycle.

<table>
<thead>
<tr>
<th>Threat and Hazards</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>High Threat/Hazard</strong></td>
</tr>
<tr>
<td>• Severe Thunderstorm and Lightning</td>
</tr>
<tr>
<td>• Cyber Threat</td>
</tr>
<tr>
<td>• Information Technology System Failure</td>
</tr>
<tr>
<td><strong>Moderate Threat/Hazard</strong></td>
</tr>
<tr>
<td>• Infectious Disease</td>
</tr>
<tr>
<td>• Civil Unrest</td>
</tr>
<tr>
<td>• Power Outage</td>
</tr>
</tbody>
</table>

These threats and hazards will be analyzed against the 32 core capabilities to determine which threat or hazard possess the greatest challenge to each core capability.

The 6 threats and hazards above will serve as the basis for planning during the 3-year strategic planning cycle of the University’s Emergency Management Program. At the end of the 3 years, the threats and hazards are reassessed and updated for the next strategic planning cycle.

The University uses the threats and hazards to adopt hazard mitigation goals and objectives to protect the University community. These goals and objectives are identified and maintained in the 2022 University of Texas at Austin Hazard Mitigation Plan. This plan will be published in the first quarter of 2022.

\(^6\) Detailed information about the National Preparedness System can be found at [https://www.fema.gov/emergency-managers/national-preparedness/system](https://www.fema.gov/emergency-managers/national-preparedness/system)

\(^7\) The core capabilities were developed by the Federal Emergency Management Agency and listed and defined at [https://www.fema.gov/core-capabilities](https://www.fema.gov/core-capabilities)
1.7. Situations and Assumptions

As described in Section 1.6 Threats and Hazards, above, the University is at risk for a wide variety of emergencies including, but not limited to, severe weather, fires, violence, and medical emergencies. This plan is an “all-hazards” plan and is intended to address any emergency or disaster situation that may arise on campus.

This plan is based on a set of planning assumptions or assumed operational conditions that provide a foundation for establishing protocols and procedures. These assumptions are listed below:

- Critical lifeline utilities may be interrupted, including water delivery, electrical power, natural gas, telephone communications, microwave and repeater-based radio systems, cellular telephones, and information systems.
- Regional and local services may not be available.
- Major roads, overpasses, bridges, and local streets may be damaged.
- Buildings and structures, including homes, may be damaged.
- Damage may cause injuries and displacement of people.
- Normal suppliers may not be able to deliver materials.
- Contact with families and households of the University community may be interrupted.
- People may become stranded at the University, and conditions may be unsafe to travel off campus.
- Emergency conditions that affect campus will likely affect the surrounding community, including the city of Austin and Travis County.
- The University will not receive outside assistance in rapid damage assessment and will need to conduct its own situation analysis and deployment of on-site resources and management of emergency operations on campus, through the campus ECC/EOC while emergency conditions exist.
- Communication and exchange of information will be one of the highest priority operations for the campus ECC/EOC.

2. Concept of Operations

2.1. University Emergency Management Responsibilities

The University is responsible for protecting life and property from the effects of emergencies or disasters that occur on campus. The University has the primary responsibility for the management of emergencies or disasters that occur on campus or impact campus. The University is also responsible for coordinating amongst external agencies that also respond to emergencies or disasters on campus.

The University’s top priorities during an emergency are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders,
- Protect University property and mitigate damage to the University,
- Protect the environment of the University and its natural resources,
- Protect and restore critical infrastructure and key University resources,
- Restore University operations,
- Coordinate among appropriate stakeholders, and
- Facilitate the recovery of University individuals.

The Office of Emergency Management is the designated emergency management agency for the University and is empowered with the authority to administer the emergency management program through the Office of Campus Safety. The Director of the Office of Emergency Management is the designated individual empowered with the authority to execute the Emergency Management Program.
The Office of Emergency Management is responsible for all four phases of emergency management (mitigation, preparedness, response, and recovery). Some of the responsibilities of these phases include developing and maintaining University-level emergency plans, managing the Emergency Operations Center, and conducting preparedness activities, including training and exercises.

The Campus Safety and Security Committee has developed the Emergency Management Program Advisory Committee (EMPAC) which functions as the advisory committee for the emergency management program and provides coordinated input by stakeholders in the preparation, implementation, evaluation, and revision of the program. EMPAC meets on a quarterly basis to provide input into the projects and operations of the program.

Additional departmental emergency responsibilities are detailed in the 3.4.1 Emergency Support Functions in this plan.

2.2. Key Areas of Emergency Planning and Incident Management

The University is responsible for conducting emergency management activities before, during, and after an emergency. In general, the University conducts the following emergency management activities:

- **Mitigation**
  Mitigation activities provide a critical foundation in the effort to reduce the loss of life and property from natural and/or human-caused disasters by avoiding or lessening the impact of a disaster. Mitigation is usually a pre-disaster activity, although mitigation efforts may also occur in the aftermath of an emergency or disaster to prevent an expansion or repetition of the effects.

- **Preparedness**
  Preparedness actions involve a combination of planning, resources, training, exercising, and organizing to build, sustain, and improve operational capabilities. Preparedness is the process of identifying the personnel, training, and equipment needed for a wide range of potential incidents, and developing specific plans for delivering capabilities when needed for an incident. Among the preparedness activities included in the emergency management program are:
    - Emergency planning, including maintaining this plan, its annexes, supplements and associated procedures,
    - Providing emergency equipment and facilities,
    - Conducting or arranging appropriate training for emergency responders, emergency management personnel, and University officials, and
    - Conducting periodic drills and exercises to test emergency plans and training.

- **Response**
  Response activities are immediate actions to save and sustain lives, protect property and the environment, and meet basic human needs. Response activities include: warnings, emergency medical services, law enforcement operations, evacuation, shelter and mass care, search and rescue, and other associated functions.

- **Recovery**
  If an emergency occurs, the University will carry out a recovery program that includes both short and long-term operations. Recovery includes the development, coordination, and execution of service and site restoration plans, the reconstitution of operations and services, evaluation of the incident to identify lessons learned, post incident reporting, and development of initiatives to mitigate the effects of future incidents.
2.3. Plan Implementation

The concepts and operations of this plan will be implemented in accordance with needs, available resources, and the declared readiness level.

The plan is activated whenever emergency conditions exist in which normal operations cannot be performed and immediate action is required to:

- Save and protect lives,
- Coordinate communications,
- Prevent damage to the environment, systems, and property,
- Provide essential services,
- Temporarily assign University staff to perform emergency work, and/or
- Invoke emergency authorization to procure and allocate resources.

Activation of emergency response will include the establishment of an Incident Command System. Depending upon the nature of the emergency, certain emergency functions may not be activated or may be activated after the initial response has already begun. The University will only activate those functions that are required, although the plan does allow for activation of all functions in the event of a worst-case scenario. The Incident Commander/Unified Command will determine what functions need to be activated. (For more information about emergency functions and organization, see Section 3.4 Support Functions.)

2.4. Levels of Readiness and Activation

The University uses a four-level system to describe different levels of readiness and emergency response activation. This system allows for a “build-up” period during which actions can be taken to establish a state of maximum readiness. The system also helps build a common operating picture so that all responding departments will have the same mindset about the severity and urgency of the situation.

The Assistant Vice President for Campus Safety (AVPOCS) or designee will determine the appropriate readiness level and notify University emergency personnel when levels change in response to an incident or planned event.

The levels of readiness found on the next page are based on the State of Texas Readiness Levels which can be found in the State of Texas Emergency Management Plan.
<table>
<thead>
<tr>
<th>Level</th>
<th>Definition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>IV</td>
<td>Normal Conditions</td>
<td>No significant emergency is present. The University continues to conduct normal business and monitors threats. University and local responders resolve emergencies that might occur in their areas.</td>

<td>Actions may include developing coordination meetings or conference calls as well as increased threat monitoring.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The EOC is typically not activated, although Campus Safety staff may conduct monitoring activities from the EOC.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Typical Events: Forecasted inclement weather, natural hazards in the area such as wildfires or flooding, and planned protests or large gatherings.</td>
</tr>
<tr>
<td>II</td>
<td>Escalated Response Conditions</td>
<td>An emergency has occurred that requires the University to respond. Coordination between University departments is required and some external agencies may also be involved. The University has most if not all of the resources required to respond to the event.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The EOC is partially activated. Some EOC member may activate virtually with designated collaborative tools. The CCMT is notified.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Typical Events: Inclement weather that has affected or is likely to affect University operations, any emergency that is brief in nature and does not require prolonged activation or recovery.</td>
</tr>
<tr>
<td>I</td>
<td>Emergency Conditions</td>
<td>An emergency has occurred that requires the University to respond. Required resources generally exceed the University’s capacity and requires assistance from local or regional partners. Involves multiple University departments and outside agencies. Response operations may also be sustained over multiple operational periods and normal operations may be canceled or suspended.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The EOC and CCMT are both fully activated.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Typical Events: Major act of violence on campus, natural disaster, or any emergency that requires major coordination amongst University departments and/or with outside agencies.</td>
</tr>
</tbody>
</table>

No-notice or unplanned events involve on-scene responders implementing life-saving actions in a quick manner. The UT Austin Police Department Dispatch Center will likely receive the first notice of an unplanned emergency situation. When the event rises to a level that exceeds the university’s normal response capabilities, the UT Austin Police Department will notify the Assistant Vice President for Campus Safety and the Director of Emergency Management for Emergency Operations Center activation and coordination. See 4.2 Communication Plan for Critical Incidents that are channeled through UTPD for more information.
3. **Direction, Control, and Coordination**

The University has adopted the Incident Command System (ICS), as part of the National Incident Management System (NIMS) as its command structure to manage large-scale planned events, emergencies, and disasters. The Director of Emergency Management is the coordinator for ICS implementation. ICS is an emergency management construct designed to provide an integrated organizational structure reflecting the complexity and demands of all types of incidents. ICS is an all-hazards incident management tool allowing the response of many different university departments and outside agencies to be coordinated. It can be expanded or contracted based upon the size of the incident, maintains a limited span of control, and follows a clear chain of command.

The University Emergency Management Program is responsible for ICS implementation during emergency response operations. The program will ensure adherence to the principles of NIMS and ICS, use of common terminology, integrated communications, and the use of pre-designated facilities such as the University EOC. The Program will also ensure that NIMS and ICS are integrated into all emergency training and exercises.

During emergency response operations, the Director of the Office of Emergency Management or his designated representative is responsible for the implementation of ISC. The director will establish an Incident Commander/Unified Command as required, designate personnel responsible for operations, planning, resource management, coordination with outside agencies. For large scale incidents, the Director will ensure that each sub unit is organized in a modular fashion with proper span of control.

3.1. **Continuity of Government**

The president of the University is the chief administrative officer of the University and is responsible for developing and administering plans and policies for the program, organization, and operation of the University.\(^8\)

The following succession order will be adhered to in the absence of the president:

1. President
2. Executive Vice President & Provost
3. Senior Vice President & Chief Financial Officer

The Assistant Vice President for Campus Safety (AVPOCS) and the Assistant Vice President for Campus Security (AVPOCSEC) are responsible for overseeing emergency command. The following succession order will be adhered to in the absence of the AVPOCS & AVPOCSEC with regard to Unified Command:

**Assistant Vice President for Campus Safety**

1. Assistant Vice President for Campus Safety (AVPOCS)
2. Director of Emergency Management
3. Director of Environmental Health and Safety

**Assistant Vice President for Campus Security**

1. Assistant Vice President for Campus Security (AVPOCSEC)
2. Assistant Chief of Police & Chief of Staff, UTPD
3. Assistant Chief of Police & Operations Bureau, UTPD

---

\(^8\) The University of Texas at Austin, Handbook of Operating Procedures, 1-1020, Officers of Administration

The University of Texas System, Regent’s Rules and Regulations, Rule 20201, Presidents Emergency Operations Plan
Other departments and administrative officers are encouraged to develop succession orders as well, particularly if their function involves emergency response.

### 3.2. Incident Organization

Two working groups lead the University during an emergency: the Core Crisis Management Team, working out of the Emergency Command Center, and the Incident Command Staff working out of the Emergency Operations Center.

#### 3.2.1. Core Crisis Management Team and Emergency Command Center

The Core Crisis Management Team (CCMT) consists of University senior leadership and is responsible for addressing policy issues and provides strategic direction and the authority to respond to the emergency to the Incident Command Staff. The Office of the President leads the CCMT.

The CCMT assembles in the Emergency Command Center (ECC), located in Stark Library. If this facility is unsafe or otherwise inaccessible, the ECC will relocate to an alternate location.

For additional information on the Core Crisis Management Team and Emergency Command Center, see below, Other Support Functions. Additionally, the Office of Emergency Management maintains a CCMT Guidebook with specific procedures regarding activation, information sharing, and individual roles and responsibilities.

#### 3.2.2. Unified Command

When an incident occurs, a Unified Command will be established between the Assistant Vice President for Campus Safety and the Assistant Vice President for Campus Security, or their designees. Unified Command and the Command and General Staff manage the operational response to the emergency and coordinates among responders. Other entities may be incorporated into the Unified Command as needed.

#### 3.2.2.1. Emergency Operations Center

The Emergency Operations Center is activated whenever emergency conditions exist that exceed the capabilities of normal operations and immediate action is required to save and protect lives, coordinate communications, prevent damage to the environment, systems, and property, provide essential services, temporarily assign...
University staff to perform emergency work, and/or invoke emergency authorization to procure and allocate resources.

Upon activation, incident staff will report to the Emergency Operations Center (EOC). If the primary location is unsafe or otherwise inaccessible, the staff will assemble in an alternate location. The President, Senior Vice President and CFO, Assistant Vice President for Campus Safety, and the Assistant Vice President for Campus Security may activate the EOC. The EOC is typically activated via text message using the University’s mass notification system.

The EOC brings together decision makers to coordinate the flow of information and the development of response strategies. All organizations involved in responding to the emergency should provide a representative in the EOC. The general responsibilities of the University’s EOC include:

- Assemble accurate information on the emergency situation and current resource data to allow on-scene officials to make informed decisions on courses of action;
- Determine and prioritize required response actions and coordinate their implementation, working with representatives of emergency services;
- Provide resource support for emergency operations;
- Organize and activate large-scale evacuation and mass care operations; and
- Provide emergency information to the public.

The EOC will also coordinate with Austin/Travis County Joint Area Command as appropriate.

The Office of Emergency Management maintains an EOC Guidebook with detailed information regarding EOC procedures including activation, information sharing, and position-specific roles and responsibilities.

### 3.2.2.2. Incident Command Post

Upon the occurrence of an incident, and if appropriate, an Incident Command Post, or multiple posts, will be established in the vicinity of the incident site(s). The Incident Commander/Unified Command, or designee, will be responsible for directing the emergency response and managing the resources at the incident scene.

### 3.2.2.3. Command and General Staff

The University fills the following positions within the command and general staff, depending upon the nature of emergency and the readiness level.

<table>
<thead>
<tr>
<th>Position</th>
<th>Primary University Staff Title</th>
<th>Emergency Roles and Responsibilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>EOC Manager</td>
<td>Director of Emergency Management</td>
<td>Responsible for overseeing the Emergency Operations Center.</td>
</tr>
<tr>
<td>Public Information Officer</td>
<td>Director of Campus Safety Communications</td>
<td>Advises the Incident Commander on information dissemination and media relations, obtains information from and provides information to the Plans Section, and obtains information from and provides information to the community and media.</td>
</tr>
<tr>
<td>Liaison Officer</td>
<td>Director of Emergency Management</td>
<td>Assists the Incident Commander by serving as a point of contact for agency representatives who are helping to support the operation and provides briefings to and answers questions from supporting agencies.</td>
</tr>
<tr>
<td>Safety Officer</td>
<td>Director of Environmental Health &amp; Safety</td>
<td>Advises the Incident Commander on issues regarding incident safety and works with the Operations Section to ensure the safety of field personnel.</td>
</tr>
<tr>
<td>Position</td>
<td>Primary University Staff Title</td>
<td>Emergency Roles and Responsibilities</td>
</tr>
<tr>
<td>--------------------------------</td>
<td>-------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Operations Section Chief</td>
<td>Assistant Chief, UTPD</td>
<td>Responsible for managing all tactical operations at an incident.</td>
</tr>
<tr>
<td>Planning Section Chief</td>
<td>Director of Emergency Management</td>
<td>Responsible for providing planning services for the incident including collecting situation and resources status information, evaluating it, and processing it for use in the Incident Action Plan.</td>
</tr>
<tr>
<td>Logistics Section Chief</td>
<td>Assistant Vice President for Procurement and Payment Services</td>
<td>Provides all incident support needs.</td>
</tr>
<tr>
<td>Finance/Administration Section Chief</td>
<td>Executive Director, Accounting and Financial Management</td>
<td>Responsible for managing all financial aspects of an incident.</td>
</tr>
</tbody>
</table>

In addition to the positions noted above, the University staffs the appropriate branches within each of the above sections, as dictated by the nature of the emergency. The Office of Emergency Management maintains records of the default Emergency Operations Center organization, as well as the list of personnel who staff each position.

### 3.3. Incident Action Plans

Every response to an incident must have an oral or written action plan. The purpose of an Incident Action Plan (IAP) is to provide all incident supervisory personnel with directions and guidelines for their actions. Action plans that include the measurable, tactical operations to be achieved cover a set time frame called an operational period.

The standard operational period that the University uses is 12 hours long. Based on the specific needs of the emergency response, the actual operational period may vary. The operational period will be noted in the IAP. The Incident Commander, or designee, will determine the operational period length.

The planning of an operational period must be done far enough in advance to ensure that requested resources are available when the operational period begins.

Large incidents, which involve a partial or full activation of the ICS organization, should have written incident action plans. Emergencies with multiple operational periods should also have written incident action plans to ensure continuity. The decision to have a written action plan will be made by the Incident Commander. The essential elements in any written or oral incident action plan are:

- **Statement of Objectives**: A list or outline of objectives that are appropriate to the overall incident.
- **Organization**: A description of what parts of the ICS organization will be in place for each operational period.
- **Assignments to Accomplish the Objectives**: A list or outline of assignments, which are normally prepared for each division or group and include the strategy, tactics, and resources to be used.
- **Supporting Material**: A list or guide to additional documents, which may include, for example, a map of the incident, communications plan, medical plan, traffic plan, etc.

In general, the Planning Section Chief is responsible for the development of written Incident Action Plans. Unless otherwise warranted, the Planning Section will use FEMA ICS Forms to develop the plan. The Office of Emergency Management will maintain the records of any Incident Action Plans.

---

9 FEMA ICS Forms can be found at the following address: https://training.fema.gov/icsresource/icsforms.aspx
The IAP must be made known to all incident supervisory personnel. This can be done through briefings, by distributing a written plan prior to the start of the operational period, or by both methods.

3.4. Support Components
3.4.1. Emergency Support Functions

The University relies on Emergency Support Functions (ESFs) to carry out emergency operations. Most functions are staffed by the University however, certain functions such as Firefighting, rely on outside agencies to act as the primary responding agency.

Not all emergency support functions are activated at all times during an incident. ESFs may or may not be activated or deactivated based on the nature of the emergency and changing response needs.

Each Emergency Support Function has a primary, secondary, and tertiary representative. The Office of Emergency Management maintains the list of these personnel.

The University uses the following ESFs:

<table>
<thead>
<tr>
<th>Emergency Support Function</th>
<th>Corresponding UT Department or Local Agency</th>
<th>Responsibilities</th>
</tr>
</thead>
</table>
| ESF #1: Transportation systems and resources; | UT Parking and Transportation Services (PTS) | - Serve as lead to the Parking and Transportation Unit at the EOC during an emergency  
- Coordinate with CapMetro to cease transportation services as appropriate during an impending storm or hazard.  
- Collect, analyze, and distribute information on the status of the transportation infrastructure (e.g. parking garages and lots).  
- Manage transportation services to support emergency operations.  
- Preposition equipment and resources (e.g. signage) to support emergency operations.  
- Manage transportation services to support emergency operations.  
- Participate in debris management on university roadways.  
- Evaluate transportation needs and restore transportation services. |
| ESF #2 Communications; | UT Information Technology Services (ITS) | - Serve as the lead for the Information Technology (IT)/Communications Unit during EOC activation  
- Support communication systems in the EOC during an emergency  
- Ensure interoperability of telecommunications and maintain backup emergency communications.  
- Provide for protection of vital electronic records.  
- Provide technical assistance in data retrieval and restoration.  
- Assess the communications infrastructure. Troubleshoot, maintain, and support university communication systems |
| ESF #3 Public works and engineering; Critical Infrastructure and key resource restoration | UT Facility Services (FS) | - Coordinate with stakeholders for debris removal and/or disposal in an orderly and timely fashion.  
- Perform university damage assessment following a disaster.  
- Perform emergency repairs (e.g. water collection systems, damaged infrastructure).  
- Address landscape management issues.  
- Lead coordination with university departments for preliminary damage assessment operations to address critical infrastructure.  
- The UT Continuity of Operations Plan (COOP) outlines the university’s essential functions for priority restoration operations |
| ESF #4 Firefighting/fire protection; | Austin Fire Department | - Coordinate with UTPD and FPS for access to campus facilities  
- Prioritize incidents and coordinate with supporting agencies and organizations during an emergency.  
- Provide emergency medical service staff along with Austin/Travis County EMS |
| ESF #5 | Information collection, analysis, and dissemination; | UT Office of Emergency Management (OEM) | • Staff the Planning Section at the EOC during an emergency.  
• Coordinate with stakeholders to develop a common operating picture.  
• Monitor conditions and collect information relative to the emergency event.  
• Analyze and share information with appropriate stakeholders |
| ESF #6 | Mass care and sheltering; | UT University Housing and Dining (UHD) | • Lead the Housing Section at the EOC during an emergency.  
• Coordinate with university departments for food and water to support sheltering operations.  
• Address the sheltering and mass care needs of student residents.  
• Provide frequent reports to the EOC |
| ESF #7 | Resource management and logistics; | UT Office of Emergency Management (OEM)/Procurement Office | • Support and coordinate the resource management system before, during, and following an emergency event |
| ESF #8 | Public health and medical services; | UT University Health Services (UHS) and UT Health Austin (UTHA) | • Liaise with Austin Public Health.  
• Coordinate with UT health personnel and resources.  
• Monitor and address public health issues and concerns.  
• Disseminate health information to the University community. |
| ESF #9 | Search and rescue; | Austin Fire Department | • Lead for urban search and rescue efforts.  
• Coordinate with UT Incident Commander, UT Police Department, and other supporting agencies and organizations.  
• Conduct physical search and rescue operations in damaged/collapsed structures and transportation accidents to locate and extricate victims.  
• Administer immediate medical attention for life-threatening injuries along with ATCEMS.  
• Carry out reconnaissance duties to assess damage and determine needs.  
• Coordinate with UT the identification of missing persons.  
• Perform specialized operations such as confined space rescues.  
• Alert stakeholders (i.e. UTPD and Austin Police, Medical Examiner, and UT) of deceased victims |
| ESF #10 | Hazardous materials; | UT Environmental Health & Safety (EHS) | • Coordinate with City of Austin Fire HazMat team(s) and other agencies and organizations during an emergency response.  
• Inform and educate the university community on hazardous material safety during an emergency.  
• Support collection and compilation of damage assessment.  
• Address environmental issues within debris management and damage assessment operations.  
• Assist with evaluating structures for habitability |
| ESF #11 | Agriculture and natural resources; | UT Environmental Health & Safety (EHS) | • Staff position at the EOC during an emergency.  
• Coordinates with other university units such as Facilities Services and regulatory agencies to protect, conserve, and manage landscape and natural resources.  
• Food Safety and Security  
• Enforce environmental laws, regulations, policies, and procedures. |
| ESF #12 | Energy and utilities services; | UT Utility and Energy Management (UEM) | • Coordinate with public works for utilities recovery and restoration.  
• Ensure generator maintenance and fuel services for backup power is maintained |
| ESF #13 | Public Safety and Security; Law Enforcement | UT Police Department (UTPD) | • Serve as lead for the Law Enforcement Unit at the EOC during an emergency.  
• Coordinate with university departments and external partners such as Austin Fire Department to address fire suppression, hazardous materials, security, traffic activities, evacuations and re-entry, etc.  
• Prioritize incidents.  
• Coordinate and provide staffing of police officers.  
• Assist in damage assessment operations.  
• Provide disaster communications support.  
• Communicating with Austin Police and other local law enforcement agencies.  
• Executing mutual aid agreements for augmenting law enforcement operations |
| ESF #14 | | UT University Development Office | • Communicate university needs with vendors and the business community.  
• Coordinate with the Logistics Section to transport resources |
### Emergency Operations Plan

#### 3. Direction, Control, and Coordination

<table>

<td>UT University Housing and Dining (UHD)</td>
</tr>
<tr>
<td>• Determine anticipated food and water needs and begin the process of obtaining items.</td>
<td></td>
</tr>
<tr>
<td>• Provide immediate food and water needs of those sheltering at UT.</td>
<td></td>
</tr>
</tbody>
</table>
In addition to the functions in the above table, a number of working groups made up of personnel from multiple campus departments support the University’s emergency response operations. These groups are listed below, as well as a summary of their membership and function.

- **Core Crisis Management Team**

  The Core Crisis Management Team (CCMT) consists of executive-level positions from across campus and serves as the definitive decision-making body for crisis issues on campus. The Core Crisis Management Team convenes to address and provide guidance to a variety of emergency incidents.

- **Critical Incident Response Team**

  The purpose of the Critical Incident Response Team (CIRT) is to provide services to the students of our University in times of individual or community-wide crisis or trauma. Members of CIRT meet as needed to review critical incidents and to implement coordinated response protocols to a specific crisis or emergency. The CIRT is made up of leaders from the Vice President for Student Affairs Office, the Dean of Students’ Office, as well as other important student services and safety organizations. Depending on the nature of the situation, either the entire group will meet or select members of the team will convene to identify an appropriate response.
• **Behavioral Risk Assessment Committee**

The Behavioral Risk Assessment Committee (BRAC) reviews situations involving staff, faculty and individuals unaffiliated with the university whose behavior may pose an adverse impact to the university community. The BRAC is a multidisciplinary group with members from Human Resources, Legal Affairs, the Office of the Executive Vice President and Provost, and the University Police Department. The BRAC reviews, investigates, and assesses reports of troubling behaviors and situations involving employees and unaffiliated individuals.

• **Behavioral Assessment Team**

The Behavior Assessment Team (BAT) is a group of individuals representing central administration, academic affairs, campus police, and student affairs who serve as a strategy development resource team for the University community to address situations involving students who are exhibiting some sort of aberrant or menacing behavior. In these situations, the student is not necessarily violating an institutional rule, breaking a law, or exhibiting any sort of threatening behavior toward self, others, or property. However, the behavior could be considered by the reasonable person to be abnormal, anti-social, problematic, menacing, and/or aberrant. In the majority of the cases, the student exhibits behavior that rises to the level of a mental health concern.

• **VP Council**

The Vice Presidents Council is a standing committee of the University chaired by the president. The president consults the Vice Presidents Council about issues of campus safety and security as appropriate. The council is made up of the Vice Presidents as well as other University executives.

• **Campus Safety & Security Committee**

The Campus Safety & Security Committee’s (CSAS) mission is to provide strategy and guidelines for campus wide security initiatives that affect the University community. The CSAS committee is made up of a cross section of University constituents, from a multitude of interest areas, with the goal of creating consensus on issues impacting campus safety.

  o **Internal and External Support Teams**

    The Internal and External Support Teams provide resources on an as needed basis depending on the availability of University resources.

3.5. **Resource Coordination**

3.5.1. **University Resources**

During emergency operations, department heads will retain administrative and policy control over their employees, supplies, and equipment. The Incident Commander/Unified Command may request, mobilize, and direct the resources of other departments to carry out response operations. The Incident Commander/Unified Commander will also direct the demobilization or recall of requested University resources.

All resource requests must be coordinated through the UT EOC Logistics Section and, if approved by the Incident Commander/Unified Command, procured with the assistance of the Finance and Administration Section.
3.5.2. Outside Assistance

If resource needs exceed the capacity of the University, the University may request assistance from the University of Texas System, other jurisdictions, organized volunteer groups, or the state.

All external assistance furnished to the University is intended to supplement University resources and not substitute for such resources, including mutual aid resources, equipment purchases or leases, or resources covered by emergency service contracts. The University must request assistance from the City of Austin and Travis County before requesting state assistance.

- **State and Local Assistance**

Requests for assistance from the City of Austin or Travis County should be made to the Austin/Travis County Joint EOC/Area Command.

Requests for state assistance should also be made to the Austin/Travis County Joint EOC/Area Command.

- A request for state assistance must be made by the AVPOCS or the AVPOCSEC, and may be made by telephone, fax, or e-mail.
- The City of Austin Office of Homeland Security & Emergency Management Director will forward requests for assistance that cannot be satisfied by resources within the area to the State Operations Center (SOC) for action.

- **Federal Assistance**

Federal assistance may also be available. Federal assistance can only be requested if the need exceeds the local and state capacity.

- **External Resource Management**

If required, the Incident Commander/Unified Command will designate a resource manager either in the Incident Command Post or the EOC. The resource manager is responsible for the tracking and accounting for external resource requests. As required, the resource manager will designate areas for storage and staging of external resources, supplies, donated goods, and facilities.

4. Communications

Rapid and timely communication of information to the University public during emergencies is critical. In addition, accurate and timely communication of information to incident response personnel is required for adequate response to emergency incidents.

This section contains a summary of the communication methods that the University uses in the event of an emergency. More detailed information about communications is contained in the Crisis Communications Plan maintained by the Office of Emergency Management.

4.1. Emergency Alert/Notifications

The University maintains a number of communication tools to notify the University community of an emergency. The actual communication methods may vary depending upon the nature of the incident although all of the following tools are available.
• **Text Message Mass Notification System**  
This communication platform is used both for mass notification and to notify response personnel. Emergency notifications and instructions are sent via text messages, pagers, phone lines and e-mails. Notifications can also be sent to computer desktops and flat panel monitors. Notifications can be sent to all members of the University community or to select groups to activate specific portions of the emergency response plan.

• **Outdoor Warning System/Sirens**  
Outdoor speakers are located in several places on the University campus in order to alert persons on campus of an emergency that necessitates they take shelter inside. A siren and a voice message will sound to issue instructions to take shelter in the nearest building.

• **University Emergency Information Line: 512-232-9999**  
This phone number goes straight to a recording that provides information about the emergency.

• **University Group E-mail**  
Mass e-mails will be used to provide the University community with information regarding potential threats to the safety and security of the campus community. E-mails will also be used as a way to notify students, faculty, and staff of emergency situations and keep them updated on the situation. The University employs the following types of e-mails:
  
  o **Informational**: any communication that increases the awareness of campus activities, events, or services (i.e., parking disruptions); University employees and students may unsubscribe from receiving informational messages via the University group e-mail system  
  o **Operational**: communication that requires some action on the recipient’s part or a required notification by the University (i.e., a message about benefits eligible information)  
  o **Official**: a non-urgent communication from an executive officer (i.e., a message from the University president)  
  o **Urgent**: an urgent announcement from an executive officer regarding an imminent event, such as the school closing

• **Fire Panel System/Emergency Communications System (ECS) Interface**  
Buildings equipped with addressable fire panel systems incorporate an Emergency Communications Systems Interface designed to provide “real time” instructions and/or information, either remotely or locally. This system can be used in emergencies to make announcements to the entire building regarding evacuation, sheltering, or lockdown procedures.

• **Flat Panel Monitors**  
Residence halls and several of our public gathering places have flat-panel televisions where emergency announcements may be posted. These screens are owned by the departments that provide them and are dispersed throughout campus.

• **Emergency Web Page**  
Up-to-date information regarding the status of the University is always available on the University’s emergency web page (http://emergency.utexas.edu/). During and following emergency situations, important information is on this Web page, including information about University closure and any ongoing hazards. This Web page also provides links to department-specific information during an emergency (e.g., entertainment venue and program changes, class schedules and emergency operations...
procedures and schedule changes for UT-shuttle buses). In the event of an emergency situation or campus crises, it is the responsibility of each department to update the emergency web page with department-specific information as it becomes available. Other information will be posted as deemed appropriate.

- **Cable Television Emergency Alert System**
  Campus and Dorm cable operate a cable television channel available in most on campus dorms. While normally used to convey information about on-campus events and dorm-relevant information, officials can tap into this system to deliver important information to students during an emergency situation. This is tied into the national public warning system known as Emergency Alert System (EAS).

- **Public Safety Patrol Car Announcements**
  UTPD patrol cars are equipped with PA systems, which officers can use to provide instructions to pedestrians during emergencies.

- **Local Media**
  University Communications sends press releases and makes calls to contacts on a local media list. Because of the transient nature of our population, the University depends a great deal on broadcast media to notify students, faculty, and staff of emergencies before or during their commutes.
### 4.1.1. Emergency Alert/Notification Matrix

The appropriate communications methods will vary based on the nature of the emergency. The matrix below gives guidelines for the use of certain communications methods for four different categories of incidents:

<table>
<thead>
<tr>
<th>Protocol #1 Incident Advisory - Negligible Threat</th>
<th>Who Activates</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Significant Incident Notification - E-Mail Message</td>
<td>UT Police Chain of Command</td>
<td>Once (At incident conclusion)</td>
</tr>
<tr>
<td>2 Area of Interest Notification - Social Media</td>
<td>UT Police P.I.O.</td>
<td>Once (Within 30 minutes of incident receipt)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Protocol #2 Timely Warning - Ongoing Threat</th>
<th>Who Activates</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Significant Incident Notification - E-Mail Message</td>
<td>UT Police Chain of Command</td>
<td>Once (At incident conclusion)</td>
</tr>
<tr>
<td>2 Timely Warning - E-Mail</td>
<td>UT Police P.I.O.</td>
<td>Once (At incident conclusion)</td>
</tr>
<tr>
<td>3 Area of Interest Notification - Social Media</td>
<td>UT Police P.I.O.</td>
<td>Once (Within 30 minutes of incident receipt)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Protocol #3 Emergency Notification - Immediate Threat</th>
<th>Who Activates</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Emergency Notification - Campus-Wide Text Message</td>
<td>UT Police - 911 Communications</td>
<td>Once (Upon incident confirmation)</td>
</tr>
<tr>
<td><em>Campus-Wide Text Message also captures the following:</em></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Recreational Sports Display Screens</td>
<td></td>
<td></td>
</tr>
<tr>
<td>UTPD Social Media</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1a. UT Web Site Update</td>
<td>UT Police - 911 Communications</td>
<td>Once (Upon incident confirmation)</td>
</tr>
<tr>
<td>3 Campus Email</td>
<td>UT Police P.I.O.</td>
<td>Once (At incident conclusion)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Protocol #4 Area of Interest Notification</th>
<th>Who Activates</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Rapid Notification - E-Mail Message</td>
<td>UT Police - 911 Communications</td>
<td>Once (within 5 minutes of incident receipt)</td>
</tr>
<tr>
<td>2 Area of Interest Notification - Social Media Message</td>
<td>UT Police - P.I.O.</td>
<td>Once (Within 30 minutes of incident receipt)</td>
</tr>
<tr>
<td>3 Significant Incident Notification - E-Mail Message</td>
<td>UT Police - Chain of Command</td>

</tbody>
</table>
4.2. Communication Plan for Critical Incidents that are channeled through UTPD

The chart below depicts the flow of alert notifications and communications during an emergency on university property. It does not reflect decision-making activities, but instead the communication responsibilities of the persons or departments depicted.
4.3. Incident Communications

4.3.1. Greater Austin/Travis County Regional Radio System (GATRRS)
The University uses the Greater Austin/Travis County Regional Radio System (GATRRS) for radio communications. The purpose of this system is to improve the ability of public safety and public service agencies to communicate and cooperate with each other, to allow direct access to, and exchange of, data. GATRRS is a partnership agreement between the City of Austin, Travis County, Austin Independent School District, and the University of Texas at Austin. This system is interoperable, i.e. all participating organizations can communicate with one another using this system.

4.3.2. FirstNet
The University is a subscriber of FirstNet, an interoperable communications network specifically for public safety agencies. This service helps ensure that all first responder and critical University safety personnel will be able to communicate during an emergency.

5. Administration, Finance, and Logistics

5.1. Agreements and Contracts
Should University resources prove to be inadequate during an emergency; requests will be made for assistance from The University of Texas System, local jurisdictions, and other agencies in accordance with existing mutual-aid agreements and contracts and those agreements and contracts concluded during the emergency. Such assistance may include equipment, supplies, or personnel, and should follow these guidelines:

- All agreements will be entered into by authorized officials and should be in writing whenever possible
- Agreements and contracts should identify the local officials authorized to request assistance pursuant to those documents

5.2. Record Keeping for Emergency Operations
Each department that participates in an emergency response is responsible for maintaining any records generated during that response pursuant to the University Record Retention Schedule. The Office of Emergency Management maintains general records that are not specific to any other department, such as Incident Action Plans.

5.3. Activity Logs
The ICP, ECC, and the EOC will maintain accurate logs recording key response activities, including:

- Activation or deactivation of emergency facilities,
- Emergency notifications to local, state, and Federal entities,
- Significant changes in the emergency situation,
- Major commitments of resources or requests for additional resources from external sources,
- Issuance of protective action recommendations to the public,
- Evacuations,
- Casualties, and
- Containment or termination of the incident.

5.4. Emergency Costs
Departments will keep track of any incident costs, including the use of personnel, equipment, and supplies during an emergency response.
5.5. Public Protection
Public complaints regarding alleged unfair or illegal business practices often occur in the aftermath of a disaster. Such complaints will be referred to the University attorney.

6. Plan Development and Maintenance

6.1. Plan Development
The Office of Emergency Management is responsible for the overall development and completion of the Emergency Operations Plan, including any supporting annexes or operational plans.

6.2. Plan Distribution
The Office of Emergency Management shall determine the distribution of this plan and its annexes. In general, copies of plans and annexes will be distributed to those individuals, departments, and organizations tasked in this document. Distribution may take the form of electronic or physical copies. Copies will also be set aside for the University ECC and EOC, The University of Texas System, and other emergency facilities, as appropriate.

6.3. Plan Maintenance
This plan and its annexes will be reviewed annually and updated and revised as appropriate based upon deficiencies identified during actual emergency situations and exercises and when changes in threat hazards, resources and capabilities, or government structure occur.

Interim revisions may be made when one of the following occurs:

- A change in University site or facility configuration that materially alters the information contained in the plan or materially affects implementation of the plan Emergency Operations Plan,
- A material change in response resources,
- An incident occurs that requires a review,
- Internal assessments, third party reviews, or experience in drills or actual responses identify significant changes that should be made in the plan,
- New laws, regulations, or internal policies are implemented that affect the contents or the implementation of the plan, and
- Other changes deemed significant.

Plan changes, updates, and revisions are the responsibility of the Office of Emergency Management. The Office will ensure that any plan changes are distributed accordingly.
Appendix 1.  Campus Protective Actions and Procedures

1.1. Protective Actions Notice

It is the responsibility of the Incident Commander/Unified Command or the person(s) or group(s) responsible for making protective action decisions to provide the information to be included in any protective actions or public warning statement. Note, Protective Actions Notices do not take the place of any emergency notifications as required by the Clery Act. Information elements include the following:

- The nature of the problem,
- Defined area for notification,
- Recommended protective actions (i.e. evacuate or shelter-in-place),
- Recommended evacuation routes,
- Recommended shelter in place actions, and
- Any information for special needs or “at-risk” population groups.

Sources of Information

The decision to take protective actions should, if possible, be based on scientific data. This data may include, but is not limited to, one or more of the following sources:

- Measured Data
- Calculated Data
- Predicted Data

In some instances, due to an urgent threat to public safety, it may not be possible to objectively gather and analyze incident information prior to ordering protective actions. In this case, Command must depend on judgment in ordering and determining the scope of the protective actions.

Protective Action Procedures

When ordering protective actions, the following sequence shall be considered:

- Confirm that protective actions are needed.
- Confirm that there is a hazard.
  - When possible, base the decision on scientific data, such as downwind chemical plume readings, projected stream rise, or published technical guidelines.
  - If protective actions are to be needed, IMMEDIATELY notify all involved staff. Activate the Emergency Operations Center if necessary. These notifications should be done as early as possible due to the lag time groups reporting to the site and/or EOC.
  - Form the evacuation group or branch.
  - Notify regional partners if an evacuation is ordered.
- Develop the Protective Actions Notice:
  - The Protective Actions Notice can take the form below in 1.1.1, a text message, or any other form as determined by the Incident Commander/Unified Command.
  - Define the area where people should shelter-in-place or evacuate.
Define the protective actions will be provided using common terminology. Use commonly known street names and other landmarks to define the area. Do not define boundaries for the public in terms of a radius, (e.g. do not define the area as a half-mile radius around a particular point).

- Determine all other needed components for the evacuation notice such as:
  - Shelter or staging area locations.
  - Transportation arrangements.
  - Traffic control points.
  - Special instructions and/or warning information for University schools/childcare facilities, medical facilities, and neighboring businesses.
  - Confirm that all needed agencies have been notified.
  - Determine how the protective actions will be announced.
  - Have Command approve the Protective Actions Notice.
  - Disseminate the evacuation notice to the media and all other agencies that may receive calls regarding the evacuation.
  - Implement other warning systems such as door-to-door notification.

1.1.1. Sample Protective Actions Notice

Evacuation/Protective Actions Notice

Date: __________________________

Time: __________________________

The Office of Campus Safety advises the public to immediately:

1. Evacuate

2. Shelter in Place

In an area of (See Map) due to a (type of incident) located at (location).

The following affected area(s) include:

Zone One:
Zone Two:
Zone Three:
Zone Four:

Due to the nature of this situation, you must act (immediately, or within the advised timeframe).

______________________________

(Evacuation Issues, Check All Applicable)

1. Persons in the evacuation area should use their own transportation to immediately leave the area and seek shelter with friends or family.

2. Persons needing shelter may report to (shelter or staging area name and address)
______________________________
3. Capital Metro Buses will be available to pick up anyone who needs transportation to the shelter.

4. You may need to stay out of the area for as long as (timeframe, if known)

5. If you need special items such as eyeglasses, prescription drugs, special medical equipment, or diapers, take them with you. Do NOT re-enter the evacuation area or delay your evacuation to get these items.

6. Occupants who require some form of assistance in order to safely evacuate will be identified during pre-incident planning. Evacuation Escorts should be assigned to assist occupants who require evacuation assistance during an emergency. Escorts should be assigned by their Building Manager. The Floor Manager may serve as an Escort if this will not detract from other evacuation responsibilities.

(SHELTER-IN-PLACE ISSUES, CHECK IF APPLICABLE)

1. Persons who are in the identified affected areas should stay inside, close all windows and doors and shut off all ventilation such as air conditioners and heat if possible.

(Additional Instructions)

________________________________________________________________
________________________________________________________________

Persons in areas surrounding the evacuation zone should monitor the media for details and updates.

DO NOT CALL 9-1-1 OR 512-471-4441 (OPTION #9) UNLESS YOU HAVE AN EMERGENCY THAT REQUIRES POLICE, FIRE, OR EMS RESPONSE. MONITOR THE RADIO AND TELEVISION FOR UPDATES.

Evacuation Area Map or Sketch:
1.2. Restricted Access
A natural or man-made incident may affect all or part of the University campus requiring physical barriers to be placed at key campus entry points in order to restrict vehicular traffic.

The University has predetermined locations on roadways where large vehicles identified by vehicle number, vehicle type and vehicle driver will be dispatched in order to supplement or augment law enforcement efforts. When activated, Facilities Services will dispatch vehicles to block roadways with University service vehicles.

- Large University vehicles shall be placed in designated areas to provide a physical barrier to vehicular traffic (See Attachment 5 for a map of designated areas and list of designated vehicles).
- University vehicle barriers may be supplemented or replaced by manned law enforcement units. External agency law enforcement may provide mutual aid to provide perimeter control. Other physical barriers such as concrete or water filled Jersey Barriers may be deployed as required.
- Clearly defined physical barriers, such as barricades, fences, and signs shall be used to define the boundary of a Restricted Area.
- Barriers shall direct the flow of personnel and vehicles through designated entry control portals.
- Barriers and entry control portals, supplemented by other systems such as patrols or surveillance, shall be used to deter and detect introduction of prohibited articles or removal of safeguards and security interests.
- Barriers shall be used to deter and/or prevent penetration by motorized vehicles where vehicular access could significantly enhance the likelihood of a successful malevolent act.
- Barriers shall be capable of controlling, impeding, or denying access to a Restricted Area.
  - Access control requirements may be layered as appropriate for the situation. At succeeding boundaries, access controls may be increased to preclude pedestrian entry or exit to or from a Restricted Area.
  - A personnel identification system (e.g. University Identification/security badge system) shall be used to control access into Restricted Areas.
  - Automated access control systems may be used as approved by the University authority for safeguards and security.
  - Means shall be provided to deter and detect unauthorized intrusion into Restricted Areas. Means include use of intrusion detection sensors and alarm systems, random patrols, and/or visual observation.
- Circumstances may require that entrance/exit inspection be made by security personnel or with detection equipment designed to detect prohibited articles. UTPD will designate security personnel. Inspections of personnel, hand-carried items, and/or vehicles shall provide reasonable assurance that prohibited articles are not introduced and that safeguards and security interests are not removed from the area without authorization.
  - Inspections. Inspection procedures, requirements, and frequencies shall be developed based on a graduated approach and included in the appropriate security plan. Where random entry or exit inspections are permissible, the inspection shall be conducted on a percentage basis,
determined by the University authority for safeguards and security, using techniques that ensure randomness.

- Prohibited Articles. The following articles are prohibited from Security Areas, unless approved by the University authority for safeguards and security:
  - any dangerous weapon
  - explosive
  - other dangerous instrument or material likely to produce substantial injury or damage to persons or property

- Signs reflecting information on: the inspection of vehicles, packages, or persons either entering or exiting; notification of video surveillance equipment; and trespassing, if applicable, shall be posted.

- Visitor logs are required at Restricted Areas.

- A Property Protection Area is a Restricted Area established for the protection of University property. A Property Protection Area may be established to protect against damage, destruction, or theft of University-owned property. Measures taken shall be adequate to give reasonable assurance of protection and may include physical barriers, access control systems, protective personnel, intrusion detection systems, and locks and keys. Protective measures taken shall provide appropriate, graded protection.

  - Access controls, where determined to be necessary by University authority, shall be implemented to protect departmental property and facilities.

  - Signs prohibiting trespassing, where necessary, shall be posted.

  - Vehicles and hand-carried items entering or leaving shall be subject to inspection to deter and detect unauthorized removal of University assets.

  - Physical barriers, where determined to be necessary by local authority, shall be used to protect property and facilities.

  - Personnel and Vehicle Access Control. Validation of the identity and access authorization of persons allowed access shall be administered by security personnel.
1.3. Campus Evacuation

The following planning assumptions apply to campus evacuation procedures:

- Campus evacuation will either be planned with advanced notice of the emergency, or spontaneous with little or no advanced notice of the emergency.

- Campus evacuation with little or no notice of the emergency:
  o The decision to initiate an evacuation will be determined by the University leadership based on a real-time assessment of a threat to the campus community.
  o The campus will be alerted using emergency communication systems.

- Information will be provided to keep evacuees informed during the evacuation. Information will be provided as prescribed in the Emergency Operations Plan, Section 4. Communication.
  o Not all campus occupants may be able to evacuate campus by their vehicle.
  o Depending on conditions, residents and other students may not be able to remain in their quarters.
  o If an evacuation is ordered, the campus may be directed to evacuate campus immediately by foot, or by mass transit available. Conditions may prohibit departure by privately owned vehicles. Campus members may be moved to temporary staging areas as determined in coordination with the City of Austin. As conditions improve, transit will be arranged for campus members to retrieve their privately owned vehicles so they may depart to their residence.

- Activation of this plan will require consultation, and notification to the City of Austin, Travis County and the Capital Complex, Texas Department of Public Safety, and Capital Metro.

- The evacuation of large numbers of people from campus will stress the limited capabilities of roadways available for this purpose, potentially requiring substantial additional time to complete an evacuation. Consequently, an evacuation must be initiated as soon as feasible upon recognition of the threat to campus and must continue to function efficiently until completion.

- The University of Texas Emergency Operations Center will coordinate with the Austin-Travis County Emergency Operations Center to facilitate evacuation and shelter activities, if necessary. Coordination will involve the exchange of information regarding decision-making, protective actions, and resource coordination and deployment.

- The capacity of available public evacuation shelter facilities in and adjacent to the impacted areas will be determined by Campus Safety and University leadership.

- For certain hazard types, large, vulnerable populations and limited evacuation road networks may necessitate termination of evacuations prior to full completion and evacuees still at risk would need to be directed to a refuge-of-last-resort as quickly as possible.

- Any campus evacuation will require expedited coordination of all University departments to maintain an efficient and safe movement of traffic during an evacuation.
1.3.1. Planned or With-Notice Evacuation

Isolated or multiple incidents may initiate an evacuation of certain geographical or densely populated portions of the University campus, or of the University campus in its entirety. For the Planned or With Notice Evacuation, the following actions will be initiated, as applicable:

- Campus leadership will be informed of an upcoming incident that could require campus evacuation.
- Campus leadership will determine the need to evacuate the campus.
- Campus Safety will develop a campus wide announcement of the evacuation.
- All actions will be coordinated through the University Emergency Operations Center.
- Those residing on campus and within close proximity to campus will be directed to evacuate by a variety of options including mass transit, foot, bicycle or their vehicles.
- Students residing off campus within a safe area will be directed to return to their residence by mass transit or their own vehicles.
- Staff and faculty will return to their residence by the conveyance that brought them to campus.
- The University community may be directed to evacuate by identified and mapped zones.
- Outbound traffic routes impacted by construction or other impediments will be cleared or made passable to the extent possible.
- Live traffic control at critical intersections will be implemented to the extent possible.
- The City/County will be notified so that they may inform the greater Austin community of the impending traffic congestion and areas to avoid.
- Special needs population and those without transportation will be instructed to utilize available public transportation resources.

Attachment 3 includes zone and city maps that identifies routes for a geographic-based route selection, in the event of a large-scale evacuation. University personnel should familiarize themselves with these evacuation routes. Final route selection will be determined by appropriate emergency operations personnel.

1.3.2. Unplanned or No-Notice Evacuation

Management of Evacuation Operations

- **Transportation**
  
  If the University has sufficient notification, every effort will be made to encourage evacuees to leave in their own vehicles if it is safe to do so. In cases where it is not practical or where some may not have the means to leave in their own vehicles, Capital Metro buses will be used to transport evacuees to preplanned locations. All transportation requests should be routed through the Emergency Operations Center if it is activated.

  Capital Metro Specialized Transportations Services buses may be considered for persons in wheelchairs. Appropriate personnel should coordinate with University Communications when promoting the use of 9-1-1 to take calls from those who require special assistance.

- **Traffic Control**
  
  The University of Texas Police Department will establish traffic control at all entrance/exit points. The University traffic plan for an evacuation zone will include the following elements:

  o Specific actions will be implemented to maintain a smooth flow of evacuation routes off campus or to host shelters.
- Traffic control points will be established and staffed to the extent possible utilizing public safety and Parking and Transportation Services staff.
- Barricade plans including location and staffing will be coordinated in cooperation with Facility Services and public safety.
- Direction will be provided for potential one way / reverse lane operations.

Special consideration will be given to personal protective equipment that may be needed by essential personnel at barricades and traffic control points. In appropriate situations, consideration should be given to the use of non-traditional public safety personnel to staff barricades. Garage and control access gate arms will be opened to expedite vehicular egress. This resource request should be coordinated through the Emergency Operation Center when activated.

- **Security**
  Perimeter and zone security shall be a central component of any protective action incident management plan. The University of Texas Police Department will establish a plan for perimeter security as required.

- **Evacuations Requiring Shelter Operations**
  The University will coordinate with the City of Austin Homeland Security and Emergency Management to request and establish shelter operations.

- **Initial Actions**
  University EOC should immediately notify the Homeland Security Emergency Manager (HSEM) Duty Officer when a shelter may be needed. The City of Austin Office of Emergency Management will coordinate shelter selection between the University and agencies supporting shelter efforts.

  - When a shelter is not immediately available, the use of a temporary staging area such as a school gymnasium or large shopping mall parking lot will be utilized. Climate conditions will be a factor in the determination of the selection of a staging area.

- **Re-Entry**
  University leadership makes decisions regarding reentry. Consideration should be given to the following factors before allowing re-entry of the general public into an evacuation zone:

  - Restoration or availability of utility services, (e.g. restoration of gas service, including the re-ignition of pilot lights, can be time-consuming.).
  - Public health and safety issues, (e.g. vermin, standing water, debris, dangerous animals, etc.).
  - Assessment of the structural integrity or potential contamination of structures inside an evacuation zone.

  Campus notification of the re-entry plan will be made through University Communications. Frequent updates on the status of the incident and re-entry shall be provided throughout the incident.
1.4. Campus Shelter-in-Place

There may be some situations where it is not possible to safely evacuate persons, and it is safer to shelter them in-place. In general, these are situations where movement of the public would put them at greater risk than leaving them in their current location. The decision for determining protective actions (e.g. evacuation vs. shelter in place) rests with the University leadership.

1.4.1. Activation of Shelter-in-Place

Shelter-in-place is most commonly used for severe weather emergencies, particularly tornado warnings. If a tornado warning is issued for campus, an automatic text message will be issued notifying the community to shelter-in-place immediately.

The following personnel are authorized to initiate an order to shelter-in-place:

- Senior Vice President and Chief Financial Officer,
- Assistant Vice President for Campus Safety, and
- Assistant Vice President for Campus Security or their representative, including command staff and UTPD dispatch.

1.4.2. Shelter-in-Place Procedures

The procedures below outline the process for a campus-wide shelter-in-place:

- UTPD Dispatch will send a text message notification (if not sent automatically due to a tornado warning) and activate the outdoor warning siren.
- Upon receiving the notice to shelter-in-place, all persons outside should proceed to the nearest building and shelter in an interior space on the lowest floor possible, away from glass and windows. Persons should remain there until an “all clear” text message is sent.
- Once the threat to campus is clear, UTPD Dispatch or other emergency personnel will send a message notifying the campus that it is “all clear.”

A notice to shelter-in-place may correspond with the activation of the Emergency Operations Center. In that case, the Emergency Operations Center will be activated virtually until the threat to campus passes.

1.5. Campus Lockdown

In certain circumstances, such as a violent attack occurring on the main campus, it may be necessary for the University to issue a campus-wide lockdown. In general, this may occur any time a threat to people or property is external to campus buildings that requires that persons remain inside for their safety.

Lockdown is similar to a shelter-in-place in that all persons should stay indoors, but different in that all doors should be locked.

1.5.1. Activation of Lockdown

A campus-wide lockdown will be initiated whenever a situation exists that requires all campus occupants to restrict access to their buildings for their safety. The following personnel are authorized to initiate a campus-wide lockdown:

- Senior Vice President and Chief Financial Officer,
- Assistant Vice President for Campus Safety,
- Assistant Vice President for Campus Security or their representative, including command staff and UTPD dispatch, and
• Other authorized personnel including Electronic Physical Security System (EPSS) Administrators.

1.5.2. Lockdown Procedures

The procedures below outline the process for a campus-wide lockdown:

• UTPD Dispatch will send a text message notification and activate the outdoor warning siren.
• Upon receiving the notice to lockdown, all persons outside should proceed to the nearest building. Persons already inside should lock or barricade the doors to their area and remain silent and out of sight. Persons should remain there until an “all clear” text message is sent.
• Once the threat to campus is clear, UTPD Dispatch or other emergency personnel will send a message notifying the campus that it is “all clear.”

A notice to lockdown may correspond with the activation of the Emergency Operations Center. In that case, the Emergency Operations Center will be activated virtually until the threat to campus passes. For more information see the Emergency Operations Center Guidebook.

1.5.3. Lockdown Procedures for Buildings with Electronic Access Controls

Some campus buildings are equipped with electronic access controls. These controls can be remotely activated to restrict access to a building during lockdown. The process for restricting access to a building with electronic access controls follows:

o An authorized person must inform UTPD dispatch or EPSS administration to restrict access to a building or buildings. A log must be maintained and include timestamps of all names, actions and a brief description of all communications and actions taken by all parties involved.
  o UTPD Dispatch or EPSS Administrators shall ask authorized personnel if they want the card reader to continue to function for authorized entry or restrict perimeter access only.
1.6. Decision Process for a Delayed Opening or Closure of Campus during a Weather Event

The safety of students, faculty, and staff is the University’s top priority. Any decision that disrupts the normal operations of the campus seriously impacts the teaching and research mission of the University. Because of this, a process has been developed that aims to minimize the negative impacts, while ensuring the highest safety possible of the UT community.

1.6.1. Decision Authority

The president of The University of Texas at Austin makes all final decisions, based on recommendations from the University representatives participating in the weather closure conference calls.

1.6.2. Decision Timeline

In the event that the University has compelling information the night before an anticipated weather event, the deciding authority will do its best to communicate a decision by approximately 10:00 pm CTS.

When a decision is not capable of being made the night before, the decision will be made by 5:00 am CST for an all-day closure or morning delay. This will give notice to most University employees prior to them reporting to work for the typical day shift (Monday through Friday). The shuttle service starts at 6:30 am CST, and the 5:00 am CST decision will stop the service from bringing passengers to campus. In order to notify all employees in a timely manner, it is best to make the decision as soon as possible.

When a decision needs to be made for an afternoon closure due to incoming weather impacting evening crews coming to campus and normal operation staff’s commute away from campus, the decision will be made by 11:00 am CST for a 2:00 pm CST or later closure. Note: campus event venues (i.e. the Frank Erwin Center, Texas Performing Arts, etc.) close at their own discretion and do not necessarily adhere to University closures.

1.6.3. Decision Elements to Consider

The University should consider the following questions when deciding whether to close:

- Has AISD closed or delayed?
- Is there a request from city, state, or federal authorities asking to restrict or curtail traffic or movement?
- Has the city or state issued a closure message for their offices?
- Is Capital Metro operating?

1.6.4. Decision Process

Based on weather monitoring, a decision will be made for the “Big 5” to convene on a conference call for analysis and determination of activities regarding closure, delay, or normal opening operations. The “Big 5” consists of the City of Austin, Travis County, Austin Independent School District (AISD), Austin Community College (ACC), and The University of Texas at Austin (UT) representatives. The Senior Vice President/CFO serves as the Big 5 representative on the decision-making conference call supported by the AVP of Campus Safety, Director of Emergency Management and the University’s Incident Meteorologist.

Each institution makes its own determination regarding closure and the University includes conditions specific to campus in their decision-making process. However, to simplify the message to the public, facilities are either “Closed” for the entire day, openings are “Delayed” or there is an “Early Release”. Due to transportation and logistical issues, facilities close for the entire day if they are unable to open according to the following system:

- When delayed, higher education facilities open for classes at or after approximately 10:00 am CST. Each institution sets its own specific time to meet its class timetable for the day.

Once a decision is made for either a “Delay”, “Early Release”, or “Closure”, the following actions will take place:
"Big 5" Conference Call

- The University participates in the weather closure or modification conference call
- The Senior Vice President/CFO supported by the AVP for Campus Safety, Director of Emergency Management and the University Incident Meteorologist, is the University's representative on the call

President Makes Decision

- Based on the factors and recommendations provided by the Office of Campus Safety, the president will make the final decision
- Possible Decisions: Normal Operations, Delay, Closure, or Early Release

Communication to University Constituents

Communication regarding the decision made will take place on multiple platforms:
- UT Austin Safety Alert text message (Emergency Management)
- Campus Safety Email (University Marketing and Communications)
- Emergency Web Page (University Marketing and Communications)
- 512-232-9999 Recording (Emergency Management)
Appendix 2.  Building Emergencies

2.1.  Building Emergency Management

Each University building must have a Building Emergency Plan. The Office of Emergency Management maintains a template for the Building Emergency Plan that includes the following information:

- **Building Emergency Management Team**
  - This section identifies the Building Emergency Managers, Communications Coordinators, and Floor Managers for the building and includes their contact information.
  - The specific roles and responsibilities for each position are also included.

- **Building Evacuation Procedures**
  - This section includes the procedures for evacuating the building as well as assembly points specific to that building.
  - Procedures for assisting with the evacuation of persons requiring assistance, as well as a list of current occupants requiring assistance are also included.

- **Shelter-in-Place and Lockdown Procedures**
  - Shelter-in-place and lockdown procedures are common to all buildings. This section includes the actions that the Building Emergency Management Team is expected to take.

The Office of Emergency Management will ensure that each building has an emergency plan and that the plans are updated at least annually. The Office of Emergency Management will maintain the official copy of the building plans, although building managers are encouraged to have their own copy and distribute the plan appropriately.

The Office of Emergency Management maintains the master Building Emergency Plan template upon which all building emergency plans are based.

2.1.1.  Building Manager Role

The President of The University of Texas at Austin designates the highest ranking administrator (i.e. Dean, Director, or Department Head) of a unit or agency having spaces in a building owned and/or operated by the University as being responsible for designating an employee of the University as the Building Manager for that building. In a situation where two administrators of equal title share a facility, the department that occupies the predominant portion of the facility (or as agreed by the administrators) will appoint the Building Manager. As required or as necessary, the term of a Building Manager is determined by the appointing administrator. Ranking administrators should report the Building Manager designation and any change in Building Manager designation to the Office of Emergency Management. The Office of Emergency Management is responsible for maintaining the University Building Manager database. Ranking administrators should also ensure that there is at least one individual in the facility who will serve as the alternate in the Building Manager’s absence or unavailability. Departments or colleges with facilities that entail more complex management requirements may employ a Building Manager on a full-time basis, if self-funded. All duties identified in this policy must be performed by a full-time employee (faculty or staff) and can include after hours and weekend calls as necessary.

Building Managers of multi-story facilities will identify Floor Managers. Floor Manager responsibilities shall include emergency evacuation planning for the respective floor, communicating with department liaisons and Building Managers, and performing the duties assigned in the Building Emergency Plan.

Each department occupying space in a building shall appoint an individual to serve as a communication manager between the department floor managers and building manager(s).
2.1.1.1. Building Manager Responsibilities:
Coordinate and monitor the physical, environmental, life safety, and security conditions, and general maintenance and repair of the building and building systems, including but not limited to:

- **Renovation and Repair**: Act as the primary contact and liaison for actions related to building renovations; major repairs to the building; its systems (electricity, water, and chilled water) and integral equipment; minor and routine facilities upkeep and maintenance; and maintenance of safety and security equipment. Coordinate priorities related to plans for the enhancement, repair, modification, and preventative maintenance of buildings and equipment.

- **Security**: Assist and coordinate tenant department(s) with developing and implementing security design and systems for the building including security cameras, exterior doors, and exterior lighting. May be issued grand master key access to all building doors and acknowledge they hold a Position of Special Trust.

- **Emergency Planning**: Work with the Office of Emergency Management to develop a Building Emergency Plan. Develop and maintain a contact database for each department residing in the facilities. Lead and participate in the implementation of emergency plans in appropriate situations. Provide a new employee orientation for new building staff to inform them of the Building Emergency Plan and procedures and guidelines for safety, security, and fire.

- **Special Projects or Events**: Coordinate with tenant department(s) on any special projects (such as improvements to the network) or special activities (such as special event scheduling, notifications to University of Texas Police Department (UTPD)/ Parking and Transportation Service (PTS), housekeeping, security, etc.)

- **Other Duties**: Oversee and conduct periodic rounds of inspections, checking for security of facilities, functionality of equipment which may include automatic external defibrillators and first aid kits.

  Report unusual or suspicious activities. Act as primary contact to report infractions of policy (related to building activities) to University regulations and building operations.

2.1.1.2. Building Manager Qualifications:
A building manager should have the following qualifications:

- Experience with planning and coordinating services.
- Strong administration skills.
- Excellent time management, punctuality, multi-tasking, and attention to detail with follow through from start to finish and strong organizational skills.
- Knowledge of basic security and fire protection procedures. Strong verbal and written communication skills.
- Experience in working in a collaborative environment.
- Skills in objectively evaluating situations and making timely decisions to resolve problems.
- Experience in exercising independent initiative and judgment in carrying out assigned duties.
- Ability to recognize safety and security hazards and make appropriate contacts for correction.

2.2. Building Evacuation
Certain emergencies within a building, such as a fire or bomb threat, may require occupants to evacuate. Procedures and guidelines for building evacuation, including assembly locations and contact information, are detailed in each Building Emergency Management Plan.
2.2.1. **Evacuation Assistance**

Certain occupants of University buildings may require additional evacuation assistance. Those occupants are noted on individual Building Emergency Plans, as well as procedures for assisting with their evacuation.

Instructors are responsible for notifying the applicable Building Emergency Manager of students under their supervision who require evacuation assistance. Instructors are responsible for ensuring that students who require evacuation assistance report to their designated staging area. Instructors should not leave a student at a staging area until the designated escort has arrived and assumed responsibility for the student.

2.3. **Building Shelter-in-Place**

There may be some situations where it is not possible to safely evacuate persons, and it is safer to shelter them in-place. In general, these are situations where movement of the public would put them at greater risk than leaving them in their current location. The decision for determining protective actions (e.g. evacuation vs. shelter in place) rests with the University leadership. Procedures and guidelines for building shelter-in-place are contained in each Building Emergency Management Plan.

2.4. **Building Lockdown**

Violent threats outside a building may require that the building enter a state of “lockdown” where doors are locked and occupants stay inside the building until the threat is clear. Procedures and guidelines for building lockdown are contained in each Building Emergency Management Plan.

2.4.1. **Lockdown for Buildings with Electronic Access Controls**

Some campus buildings are equipped with electronic access controls. These controls can be remotely activated to restrict access to a building during a lockdown.

- The following personnel are authorized to initiate an electronic building lockdown:
  - Senior Vice President and Chief Financial Officer,
  - Assistant Vice President for Campus Safety,
  - Assistant Vice President for Campus Security/Chief of Police for the University Police Department or their representative, including command staff and UTPD dispatch, and
  - Other authorized personnel including Building Managers and/or Electronic Physical Security System (EPSS) Administrators.

- The process for restricting access to a building with electronic access controls follows:
  - An authorized person must inform UTPD dispatch or EPSS administration to restrict access to a building or buildings. A log must be maintained and include timestamps of all names, actions and a brief description of all communications and actions taken by all parties involved. UTPD Dispatch or EPSS Administrators shall ask authorized personnel if they want the card reader to continue to function for authorized entry or restrict perimeter access only.
Appendix 3. Emergency Operations Center Access

In order to facilitate access to the Emergency Operations Center and to Restricted Areas during a crisis, the University of Texas has developed the Emergency Operations Access Badge. This badge will be issued by the ITS ID Center to individuals that bring a letter on departmental letterhead signed by the Assistant Vice President for Campus Safety or his designee. All ID cards issued by the University are the property of the University and must be surrendered to a supervisor or Human Resources Services upon termination of affiliation.

(https://policies.utexas.edu/policies/university-identification-card)

- **Process**
  - The Assistant Vice President for Campus Safety will:
    - Issue a letter on departmental letterhead that:
      - Is signed by the AVP or his designee,
      - Includes the EID of the future badge holder,
      - Includes the name of the future badge holder, and
      - Requests issuance of an Emergency Operations Center Badge.
    - Send the requestor to the ID Center in the Flawn Academic Center.
  - The ID Center will:
    - Verify the letter is consistent with departmental letterhead; signature and all components indicated above are included.
    - Issue the EOC Badge.
    - ID Center bills department account for each badge distributed.

- **Badge Access and Holder Responsibilities**
  - Appropriately coded security badges will be used and accepted as evidence of an access authorization (or security clearance). Such security badges shall be accepted for admittance to Restricted Areas without a need for additional badging. Site or facility procedures may be established to require presentation of additional photo-identification media.
  - Badges shall be worn conspicuously, photo side out, in a location above the waist and on the front of the body while in designated areas as determined by University official directives and security directives unless prohibited by health or safety considerations.
  - Personnel shall protect assigned badges and maintain them in good condition. If a significant change in facial appearance takes place, a badge with a new photograph shall be requested by the individual, supervisor, or security official. Protective force personnel are authorized to confiscate faded, worn, or damaged badges.
  - Security awareness programs shall stress the importance of protecting security badges against loss or misuse. Badges shall not be used as a means of identification for unofficial purposes (e.g., cashing checks).

- **Accountability of Badges, and Credentials**
  - Records shall be maintained by issuing offices showing the disposition of badges, and credentials issued. Such records shall include, as a minimum description and serial number of item issued, date of issuance, name, organization, and date of destruction. Records will be maintained.
- **Lost Badges and Credentials.** A record of missing badges and credentials shall be maintained. Personnel and/or systems controlling access to Restricted Areas shall be provided current information regarding missing badges in order to prevent their misuse. The loss or recovery of badges or credentials shall be reported immediately to the issuing office.

- **Terminating Security Badges, and Credentials.**
  - Badges and credentials issued to employees, contractors, and other individuals shall be recovered at the final security checkpoint or earlier and the individual(s) shall be escorted from the site if circumstances or conditions indicate such action is needed. Recovered credentials shall be destroyed. Recovered badges may be retained and reissued.
Appendix 4. Threat and Hazard Response Plan Annexes

Threat and Hazard Response Plan Annexes Overview

The University plans and prepares for a wide variety of threats and hazards, some of which warrant more detailed planning. Therefore, the University maintains separate Response Plan Annexes for the following:

- **The University of Texas at Austin Infectious Disease Response Plan.** This plan is maintained by the University Office of Emergency Management and updated annually. It designates the Chief Medical Officer for University Health Services as the lead for infectious disease response for students, faculty, and staff.

- **The University of Texas at Austin Act of Violence Response Plan.** This plan is maintained by the University Office of Emergency Management and is updated annually in coordination with the University of Texas at Austin Police Department and designates the University of Texas at Austin Police Department (UTPD) as the lead for response to threat and acts of violence on the University.

- **The University of Texas at Austin Severe and Inclement Weather Response Plan.** This plan is maintained by the University Office of Emergency Management and is updated annually in coordination with the University’s Incident Meteorologist. This plan addresses severe and inclement weather threats ranging from tornados to winter storms and describes the coordination steps and implementation procedures necessary to respond to these weather incidents.

4.1. Mitigation Overview

**UT Hazard Mitigation Plan**

In order to properly mitigate hazards and respond effectively to emergencies, goals and objectives need to be established for each hazard and incident. The Office of Emergency Management is in the process of developing the 2022 University of Texas at Austin Hazard Mitigation Plan. This plan will systematically utilize resources to mitigate the effects of the hazards and risks identified in the UT THIRA. The plan will set priorities based on loss reduction and establish interim and long-term strategies, actions, goals and objectives. The UT Hazard Mitigation Plan will be published in 2022.

Unless otherwise noted, the definitions below are taken from FEMA’s Comprehensive Planning Guidance 101.

**Campus:** (i) Any building or property owned or controlled by an institution within the same reasonably contiguous geographic area and used by the institution in direct support of, or in a manner related to, the institution’s educational purposes, including residence halls; and (ii) Any building or property that is within or reasonably contiguous to the area identified in paragraph (i) of this definition, that is owned by the institution but controlled by another person, is frequently used by students, and supports institutional purposes (such as a food or other retail vendor).

**Closure:** A closure is when weather conditions exist that will be unsafe when employees and students need to travel to campus and are unlikely to improve throughout the day.

**Delay Opening:** A delay opening is when weather conditions exist that will be unsafe during the early hours when employees and students need to travel to campus but that conditions are projected to improve later in the day.

**Disaster:** An occurrence of a natural catastrophe, technological accident, or human-caused incident that has resulted in severe property damage, deaths, and/or multiple injuries.

**Early Release:** An early release is when weather conditions are likely to deteriorate later in the day impacting the safe travel of employees and students away from campus.

**Emergency:** Any incident, whether natural or human-caused, that requires responsive action to protect life or property.

**Emergency Notification:** A notification triggered by an event that is currently occurring on or imminently threatening the campus. The Clery Act requires that the University issue an emergency notification for any significant emergency or dangerous situation occurring on the campus involving an immediate threat to the health or safety of students or employees.

**Emergency Operations Center:** The physical location at which the coordination of information and resources to support incident management (on-scene operations) activities normally takes place. An Emergency Operations Center may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction. Emergency Operations Centers may be organized by major functional disciplines (e.g., fire, law enforcement, medical services), by jurisdiction (e.g., Federal, state, tribal, regional, city, county), or by some combination thereof.

**Emergency Operations Plan:** The ongoing plan maintained by various jurisdictional levels for responding to a wide variety of potential hazards. It describes how people and property will be protected; details who is responsible for carrying out specific actions; identifies the personnel, equipment, facilities, supplies, and other resources available; and outlines how all actions will be coordinated.

**Emergency Support Function:** Used by the Federal Government and many state governments as the primary mechanism at the operational level to organize and provide assistance. Emergency Support Functions align categories of resources and provide strategic objectives for their use. Emergency Support Functions use standardized resource management concepts such as typing, inventorying, and tracking to facilitate the dispatch, deployment, and recovery of resources before, during, and after an incident.

**Hazard:** A natural, technological, or human-caused source or cause of harm or difficulty.

---

10 34 CFR 668.46 (a)

11 The University of Texas at Austin, Office of Campus Safety

Incident: An occurrence or event—natural, technological, or human-caused—that requires a response to protect life, property, or the environment (e.g., major disasters, emergencies, terrorist attacks, terrorist threats, civil unrest, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, tsunamis, war-related disasters, public health and medical emergencies, other occurrences requiring an emergency response).

Incident Command System: A standardized on-scene emergency management construct specifically designed to provide an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. The Incident Command System is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure and designed to aid in the management of resources during incidents. It is used for all kinds of emergencies and is applicable to small, as well as large and complex, incidents. The Incident Command System is used by various jurisdictions and functional agencies, both public and private, to organize field-level incident management operations.

Immediate Threat to Campus: Under the Clery Act, every institution is required to immediately notify the campus community upon confirmation of a significant emergency or dangerous situation occurring on the campus that involves an immediate threat to the health or safety of students or employees. An “immediate threat” as used here includes an imminent or impending threat, such as an approaching forest fire, or a fire currently raging in a campus building. Some other examples of significant emergencies or dangerous situations are: outbreak of meningitis, norovirus, or other serious illness; approaching tornado, hurricane, or other extreme weather conditions; earthquake; gas leak; terrorist incident; armed intruder; bomb threat; civil unrest or rioting; explosion; and nearby chemical or hazardous waste spill. Examples of situations that would not necessitate an emergency notification under the Clery Act include: power outage; snow closure; and string of larcenies.

Joint Information Center: A facility established to coordinate all incident-related public information activities. It is the central point of contact for all news media. Public information officials from all participating agencies should co-locate at the Joint Information Center.

Mass Care: The actions that are taken to protect evacuees and other disaster victims from the effects of the disaster. Activities include mass evacuation, mass sheltering, mass feeding, access and functional needs support, and household pet and service animal coordination.

Mitigation: Activities providing a critical foundation in the effort to reduce the loss of life and property from natural and/or human-caused disasters by avoiding or lessening the impact of a disaster and providing value to the public by creating safer communities. Mitigation seeks to fix the cycle of disaster damage, reconstruction, and repeated damage. These activities or actions, in most cases, will have a long-term sustained effect.

National Incident Management System: A set of principles that provides a systematic, proactive approach guiding government agencies at all levels, nongovernmental organizations, and the private sector to work seamlessly to prevent, protect against, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location, or complexity, in order to reduce the loss of life or property and harm to the environment.

National Response Framework: This document establishes a comprehensive, national, all-hazards approach to domestic incident response. It serves as a guide to enable responders at all levels of government and beyond to provide a unified national response to a disaster. It defines the key principles, roles, and structures that organize the way U.S. jurisdictions plan and respond.

---

Appendix 5 - Acronyms and Definitions

Emergency Operations Plan
**Planning Assumptions:** Parameters that are expected and used as a context, basis, or requirement for the development of response and recovery plans, processes, and procedures. If a planning assumption is not valid for a specific incident’s circumstances, the plan may not be adequate to ensure response success. Alternative methods may be needed. For example, if a decontamination capability is based on the planning assumption that the facility is not within the zone of release, this assumption must be verified at the beginning of the response.

**Preparedness:** Actions that involve a combination of planning, resources, training, exercising, and organizing to build, sustain, and improve operational capabilities. Preparedness is the process of identifying the personnel, training, and equipment needed for a wide range of potential incidents, and developing jurisdiction specific plans for delivering capabilities when needed for an incident.

**Prevention:** Actions to avoid an incident or to intervene to stop an incident from occurring. Prevention involves actions to protect lives and property. It involves applying intelligence and other information to a range of activities that may include such countermeasures as deterrence operations; heightened inspections; improved surveillance and security operations; investigations to determine the full nature and source of the threat; public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and, as appropriate, specific law enforcement operations aimed at deterring, preempting, interdicting, or disrupting illegal activity and apprehending potential perpetrators and bringing them to justice.

**Protection:** Actions to reduce or eliminate a threat to people, property, and the environment. Primarily focused on adversarial incidents, the protection of critical infrastructure and key resources is vital to local jurisdictions, national security, public health and safety, and economic vitality. Protective actions may occur before, during, or after an incident and prevent, minimize, or contain the impact of an incident.

**Recovery:** The development, coordination, and execution of service and site restoration plans; the reconstitution of government operations and services; individual, private sector, nongovernmental, and public assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental, and economic restoration; evaluation of the incident to identify lessons learned; post-incident reporting; and development of initiatives to mitigate the effects of future incidents.

**Response:** Immediate actions to save and sustain lives, protect property and the environment, and meet basic human needs. Response also includes the execution of plans and actions to support short-term recovery.

**Timely Warning:** A warning regarding crimes that have already occurred but represent an ongoing threat. The University is required to issue a timely warning for any Clery Act crime committed within the Clery Act geography that is reported to campus security authorities or a local law enforcement agency, and that the University considers to represent a serious or continuing threat to students or employees.\(^\text{14}\) For additional information regarding Clery Act requirements, see *The Handbook for Campus Safety and Security Reporting*, issued by the Department of Education.

**Unified Command:** In incidents involving multiple jurisdictions, a single jurisdiction with multiagency involvement, or multiple jurisdictions with multiagency involvement, unified command allows agencies with different legal, geographic, and functional authorities and responsibilities to work together effectively without affecting individual agency authority, responsibility, or accountability.\(^\text{15}\)

The definitions below are related to building emergency management and procedures.

**Building Emergency Management Team (BEMT):** A team of occupants who manage the evacuation of a building during an emergency. The BEMT will consist of personnel assigned emergency functions including the Building Manager,

\(^{14}\) The Handbook for Campus Safety and Security Reporting, 2016 Edition

\(^{15}\) FEMA Emergency Management Institute Glossary
Assistant Emergency Manager, Access Manager, Assembly Coordinator, Elevator Manager, and Evacuation Managers for individual floors. [NOTE: The size and complexity of your individual system will be resource dependent.]

**Building Manager:** Staff member responsible for managing, planning, and coordinating activities associated with the physical, environmental, and security conditions of his or her assigned building or facility. Serves as the liaison for coordination and communications to building occupants regarding hours of operation, security, emergency preparedness, maintenance, construction repairs and renovations, and utility delivery (including elevators). For additional information, see Appendix II – Building Manager Role.

**Evacuation Assistance:** Support provided for occupants who require evacuation assistance during an emergency. Evacuation assistance should include designated staging areas, designated escorts, and an evacuation strategy for occupants.

**Floor Manager:** A floor occupant responsible for developing and executing the evacuation/sheltering plan for an individual floor and managing the floor evacuation during an emergency.

**Lockdown:** The directive “LOCKDOWN” is used to stop access and/or egress as appropriate, to all or a portion of the buildings on campus. Unless otherwise directed, consider that all buildings will initiate their “LOCKDOWN” procedures.

**Primary Assembly Area:** An exterior area utilized as an assembly location by occupants who have evacuated their building. An assembly area is designated by the Building Manager and should be located outside of the building in a safe and convenient location. This area is utilized as a temporary staging location while an emergency incident is under investigation.

**Secondary Assembly Area:** An indoor location utilized as an assembly area by occupants who have evacuated their building. Secondary assembly areas are located inside a building, or other protected area, and may be utilized during periods of inclement weather, extreme heat, or during incidents that continue for an extended period of time. (The extent of position assignment is dependent on both physical structure complexity and current staffing.)

**Shelter in Place:** The action of seeking immediate shelter indoors following the announcement of an emergency condition. The act of sheltering in an area inside a building that offers occupants an elevated level of protection. Sheltering can be related to a variety of situations, including: severe weather emergencies, hazardous condition, chemical release, or criminal activity.

**Shelter in Place – Severe Weather:** The act of sheltering in an area inside a building that offers occupants an elevated level of protection during a tornado or other severe weather related emergency.

**Shelter in Place – Chemical, Biological or Radiological:** A place of shelter is an area inside a building that offers occupants an elevated level of protection during an accident or intentional release of a chemical, biological or radiological agent. [NOTE: Many toxic chemicals have a vapor density greater than that of air, and will seek lowest ground. In the case of a Shelter in Place due to a chemical spill, do NOT shelter below grade. Follow instructions provided by emergency personnel.]
Attachment 1. Emergency Guidance for Classroom Instructors

The instructor is the senior representative of the University in the classroom and is therefore responsible for implementing University policy and directives. **In the event that an emergency occurs while class is in session, instructors are expected to facilitate the execution of the appropriate procedure, i.e. evacuation, shelter-in-place, or lockdown.**

- Instructors are responsible for pointing out their classrooms’ building emergency evacuation routes and emergency procedures to students at the beginning of each semester. This should also include the building assembly location as designated in the Building Emergency Plan and depicted on the Classroom Emergency Guide in every classroom.
- All University community members should familiarize themselves with all the exit doors of each room and building they occupy at the University, and should remember that the nearest exit routes may not be the same as the way they typically enter buildings.
- Students requiring assistance in evacuation shall inform their instructors in writing during the first week of class. Faculty members must then provide this information to Fire Prevention Services.
- Instructors should be prepared to give appropriate instructions in the event of an evacuation or other emergency. Students should follow the instructions of faculty members and class instructors during emergency evacuations.
- Instructors are responsible for notifying the applicable Building Emergency Manager of students under their supervision who require evacuation assistance. Instructors are responsible for ensuring that students who require evacuation assistance report to their designated staging area. Instructors should not leave a student at a staging area until the designated escort has arrived and assumed responsibility for the student.

1.1. Emergency Procedures

Notification to evacuate, shelter-in-place, or lockdown will be given using one or multiple communication methods including text message, building indoor emergency notification system, fire alarm system or any other method suitable to the situation.

- If instructed to **evacuate**, the instructor should direct the class to exit the building via stairwells (not elevators) and assemble at the designated location. All persons should remain at the assembly point and not reenter the building until given the “all clear” from police, fire, or the Building Emergency Management Team.
- If instructed to **shelter-in-place**, the instructor should notify the class to remain inside and direct the class to an interior space of the building away from windows and on the lowest level possible. All persons should remain sheltered until given the “all clear” notice via text message or email.
- If instructed to **lockdown**, the instructor should direct the class to silence cell phones, turn off lights, remain quiet, lock or barricade the door, and remain hidden if possible. All persons should remain in place until given the “all clear” notice via text message or email.

1.2. Recommended Syllabus Information

Instructors should include the following information and instructions about evacuation procedures in their class syllabus:

- When a fire alarm sounds, occupants of buildings on The University of Texas at Austin campus are required to evacuate buildings.
- Familiarize yourself with all exit doors of each classroom and building you may occupy. Remember that the nearest exit door may not be the one you used when entering the building.
- Students requiring assistance in evacuation shall inform their instructor in writing during the first week of class.
- In the event of an evacuation, follow the instruction of faculty or class instructors.
- Do not re-enter a building unless given instructions by the following: Austin Fire Department, The University of Texas at Austin Police Department, or Fire Prevention Services office.
- If you have concerns regarding the attitude or action of students or staff, please contact the Behavior Concerns Advice Line: BCAL 512-232-5050.
Consideration for Persons with Access or Functional Needs

1.1. General
This attachment to the Emergency Operations Plan provides a framework for response personnel working with members of the University community who may need additional assistance in times of emergency. The University is committed to working with any individual with a physical or mental impairment or condition that requires assistance to relocate within or evacuate a University building, facility, or campus area in an emergency situation. Members of the University community with limited English proficiency may also have unique considerations. This attachment lists steps and resources to help prepare those in the University community who may need assistance in an emergency situation. This is included as part of the Emergency Operations Plan to assure access to emergency preparedness, response, and recovery services for at risk and hardest to reach campus populations. At the University, planning ahead for emergencies is a part of normal business planning and campus life, and all members of the University community share a responsibility for preparedness.

For the purposes of this document, “access and functional needs populations” includes anyone who may need assistance during a building or campus emergency. The University recognizes that persons with physical or mental impairments or conditions, temporary and permanent, may require additional assistance with emergency notification, evacuation, sheltering, and transportation. It is the responsibility of the University to provide for people with a physical or mental impairment or condition the same level of safety afforded to all.

1.2. Notification
The following highlights the ways that the University ensures notifications are made more accessible for persons requiring special assistance. For additional information on notification and warning, see Section 4. Communications above or the Crisis Communications Plan.

- Text messages and emails sent via the mass notification system allow the University to communicate effectively with individuals who may be deaf or hard of hearing.
- The University uses EAS messages to appear captioned on the campus cable televisions.
- Many buildings have installed audio alert systems that relay emergency messages to aid those without text message capabilities or visual impairments.

1.3. Evacuation Assistance
Certain occupants of University buildings may require additional evacuation assistance. Faculty and staff who may require additional evacuation assistance should notify the Building Emergency Manager to ensure that they are properly documented on individual Building Emergency Plans.

Instructors are responsible for notifying the applicable Building Emergency Manager of students under their supervision who require evacuation assistance. Instructors are responsible for ensuring that students who require evacuation assistance report to their designated staging area. Instructors should not leave a student at a staging area until the designated escort has arrived and assumed responsibility for the student.

1.4. Emergency Procedures Guidance
The following information can assist persons who require evacuation assistance during an emergency:

- Persons who need evacuation assistance should shelter-in-place in the designated area of refuge in the building.
- In buildings equipped with an area of refuge two-way communication system for communication between the area of refuge and a central control point, follow the instructions for summoning assistance via the two-way communication system.
• In buildings not equipped with an area of refuge two-way communication system, the person needing assistance should call 911 and notify the dispatcher of the situation and their location.
• You are encouraged to carry a sounding device like a small whistle, flashlight, and/or cell phone to alert emergency personnel of your location.
• It is best to have arrangements pre-planned for evacuation assistance. Contact your Building Manager or the Office of Emergency Management for assistance in pre-planning evacuation.

1.5. Additional Resources
Persons with access or functional needs can contact the following offices for assistance:
• Services for Students with Disabilities: https://diversity.utexas.edu/disability
• The Office of Inclusion and Equity: https://equity.utexas.edu
• Human Resources: https://hr.utexas.edu
• The Office of Campus Safety: https://besafe.utexas.edu
Attachment 2. Evacuation Zones and Evacuation Routes

Campus Evacuation Routes

If a large-scale evacuation is ordered, the information below provides preliminary guidance for directionally based evacuation route selection. The information below represents the best estimates of pre-planned evacuation zones. Due to the evolving nature of evacuation incidents, final route selection will be determined by appropriate University operations personnel.

To the South:

Take Red River south to Martin Luther King Boulevard or 15th street
Take San Jacinto south to Martin Luther King Boulevard or 15th
Take Guadalupe south to Martin Luther King Boulevard or 15th

From Martin Luther King Boulevard or 15th you may either take IH35 south or Mopac (Texas State Highway Loop 1) or stay on Guadalupe. All three routes lead south of campus.

To the West:

Take Martin Luther King Boulevard to Lamar
Take 21st to Guadalupe and then to Martin Luther King Boulevard
Take 24th street to Lamar or stay on 24th to Mopac (Texas State Highway Loop 1)
Take Dean Keaton to Guadalupe-north on Guadalupe to 29th or 38th then west to Lamar or Mopac (Texas State Highway Loop 1)

To the North:

Take Red River to Dean Keaton or 32nd or 38th where you can take IH 35 or continue north
Take San Jacinto north to 30th and then go east or west to take Red River or Guadalupe
Take Guadalupe north to 29th or 38th, 29th provides access to Lamar, 38th provides access to Lamar, or Mopac (Texas State Highway Loop 1) or IH35

To the East:

Take Martin Luther King Boulevard east to IH35, Airport or Ed Bluestein
Take Clyde Littlefield (Manor Road) to IH35, Airport or Ed Bluestein
Take Dean Keaton east to IH35, Airport Boulevard or Ed Bluestein
2.1. Building Identification by Zone

University community members should know what zone(s) they occupy and the respective evacuation route.
Attachment 3. Crisis and Emergency Working Group Rosters
